FIELD_1

The screenshot shows a desktop application window titled 'SDUM...'. The menu bar includes File, Areas, Sample, Conversor, Manage, Interpolation, Statistics, System, and Help. Below the menu is a toolbar with various icons for file operations like Open, Save, Print, and Geometric Tools. A 'Layers' panel on the left lists 'FIELD_1'. The main workspace displays a map with a polygon boundary and a central text overlay 'SDMZ Project'. To the right, there are two panels: 'Layers Data' which shows 'Areas' and 'FIELD_1', and 'Project's Data' which also shows 'FIELD_1'. The bottom of the window has a toolbar with eye, zoom, and other controls.

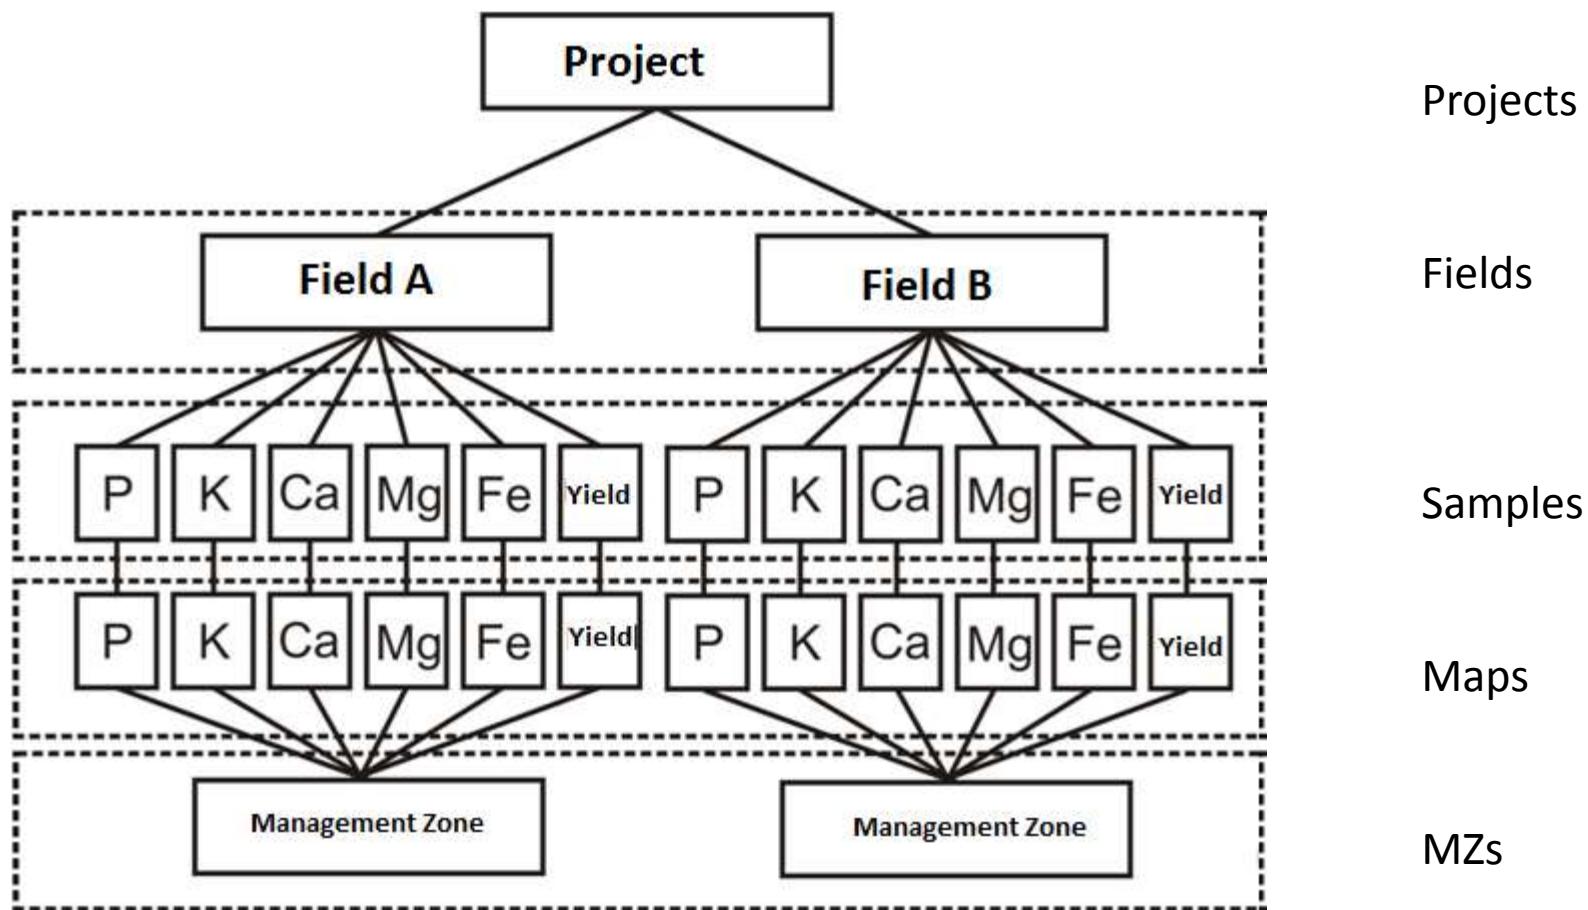

Objectives SDMZ

- Easy management data;
- Create thematic maps;
- Generate Management Zones;
 - K-Means;
 - Fuzzy C-Means;
 - Empirical Methods;
- Evaluate Management Zones;
 - Anova;
 - Reduction of Variance
- Other Functions

(*) Significant (NS) No Significant

Select of Layers

1. discard of layers with autocorrelation not significant;
2. discard of layers with correlation with yield not significant;
3. order the others layers in order decreasing in relation the correlation with yield
4. discard of redundant layers

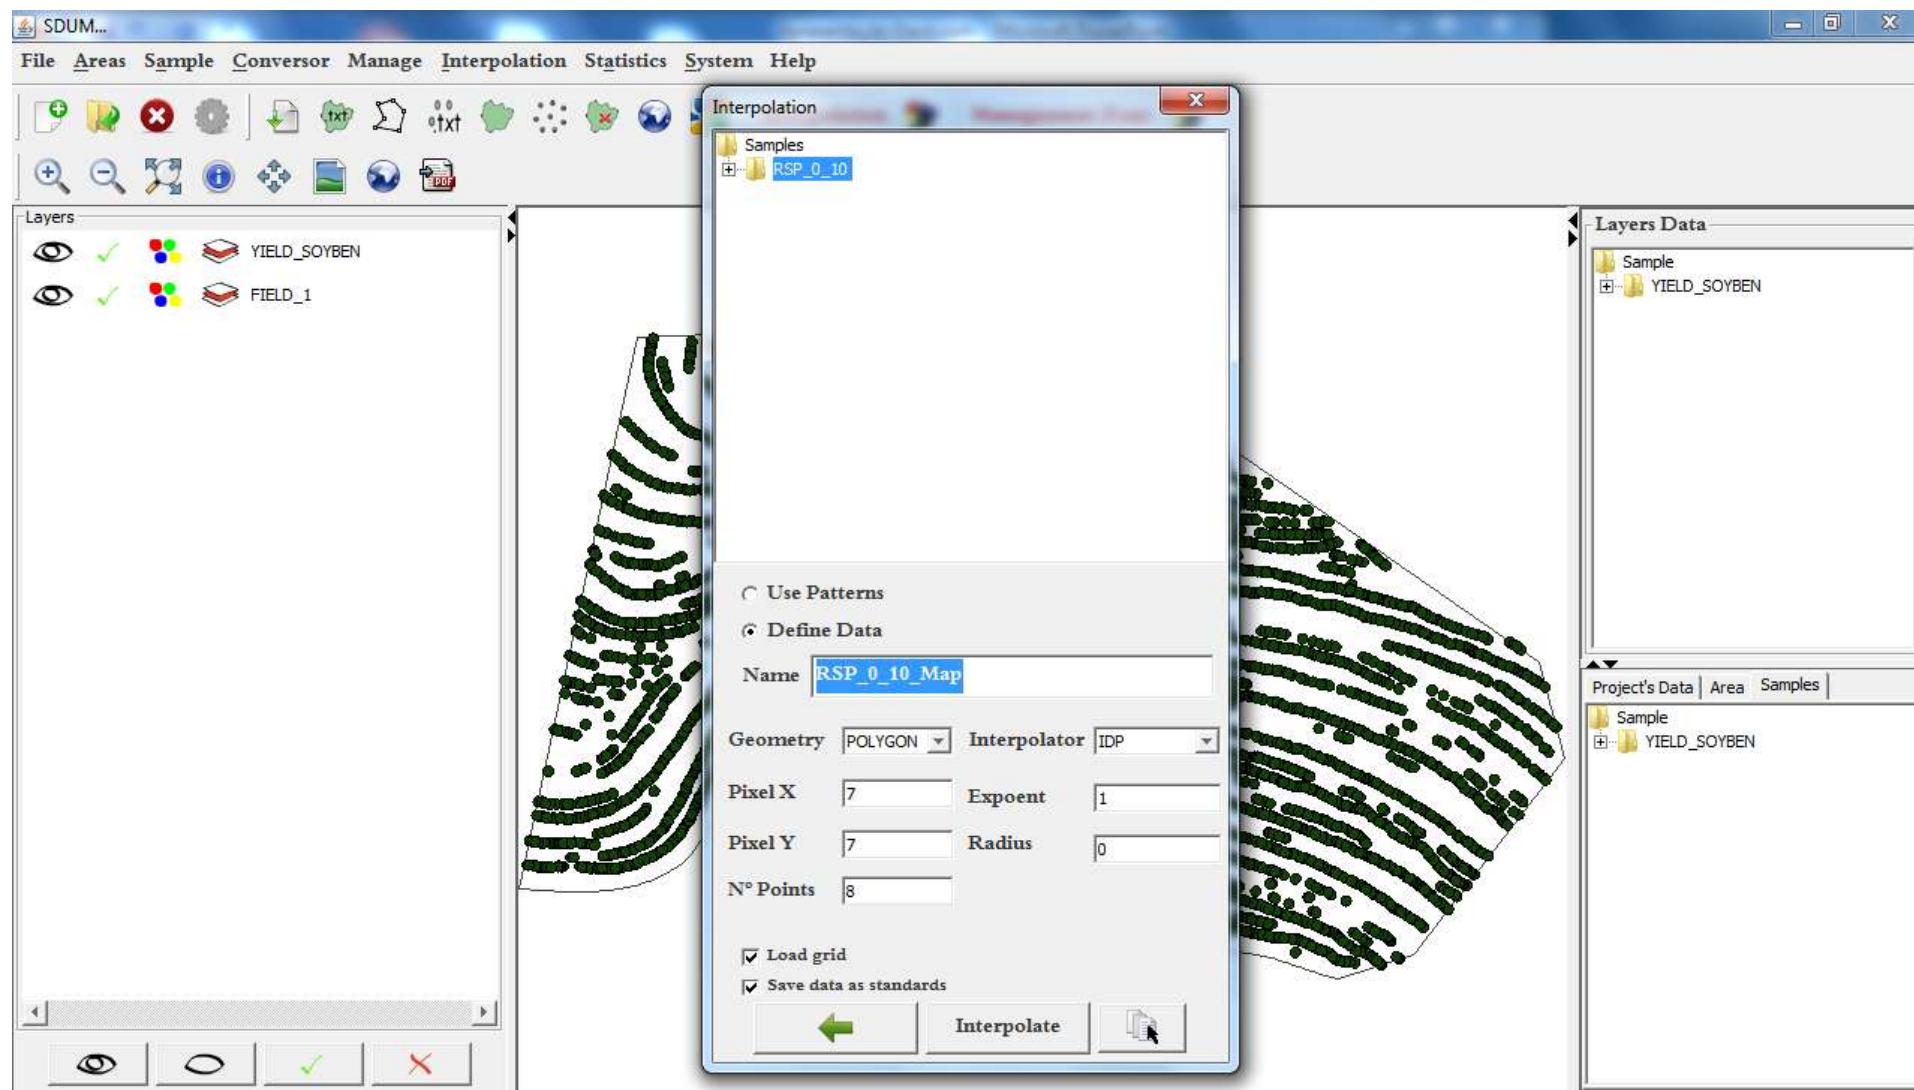

$$I_{YZ} = \frac{\sum_{i=1}^n \sum_{j=1}^n \omega_{ij} * Y'_i * Z'_j}{S \sqrt{m_{Y'}^2 * m_{Z'}^2}}$$

Generate Management Zones

- Empirical Methods:
 - Normalized data
 - Padronized data
- Clustering Methods:
 - K-Means:
 - Fuzzy C-Means:

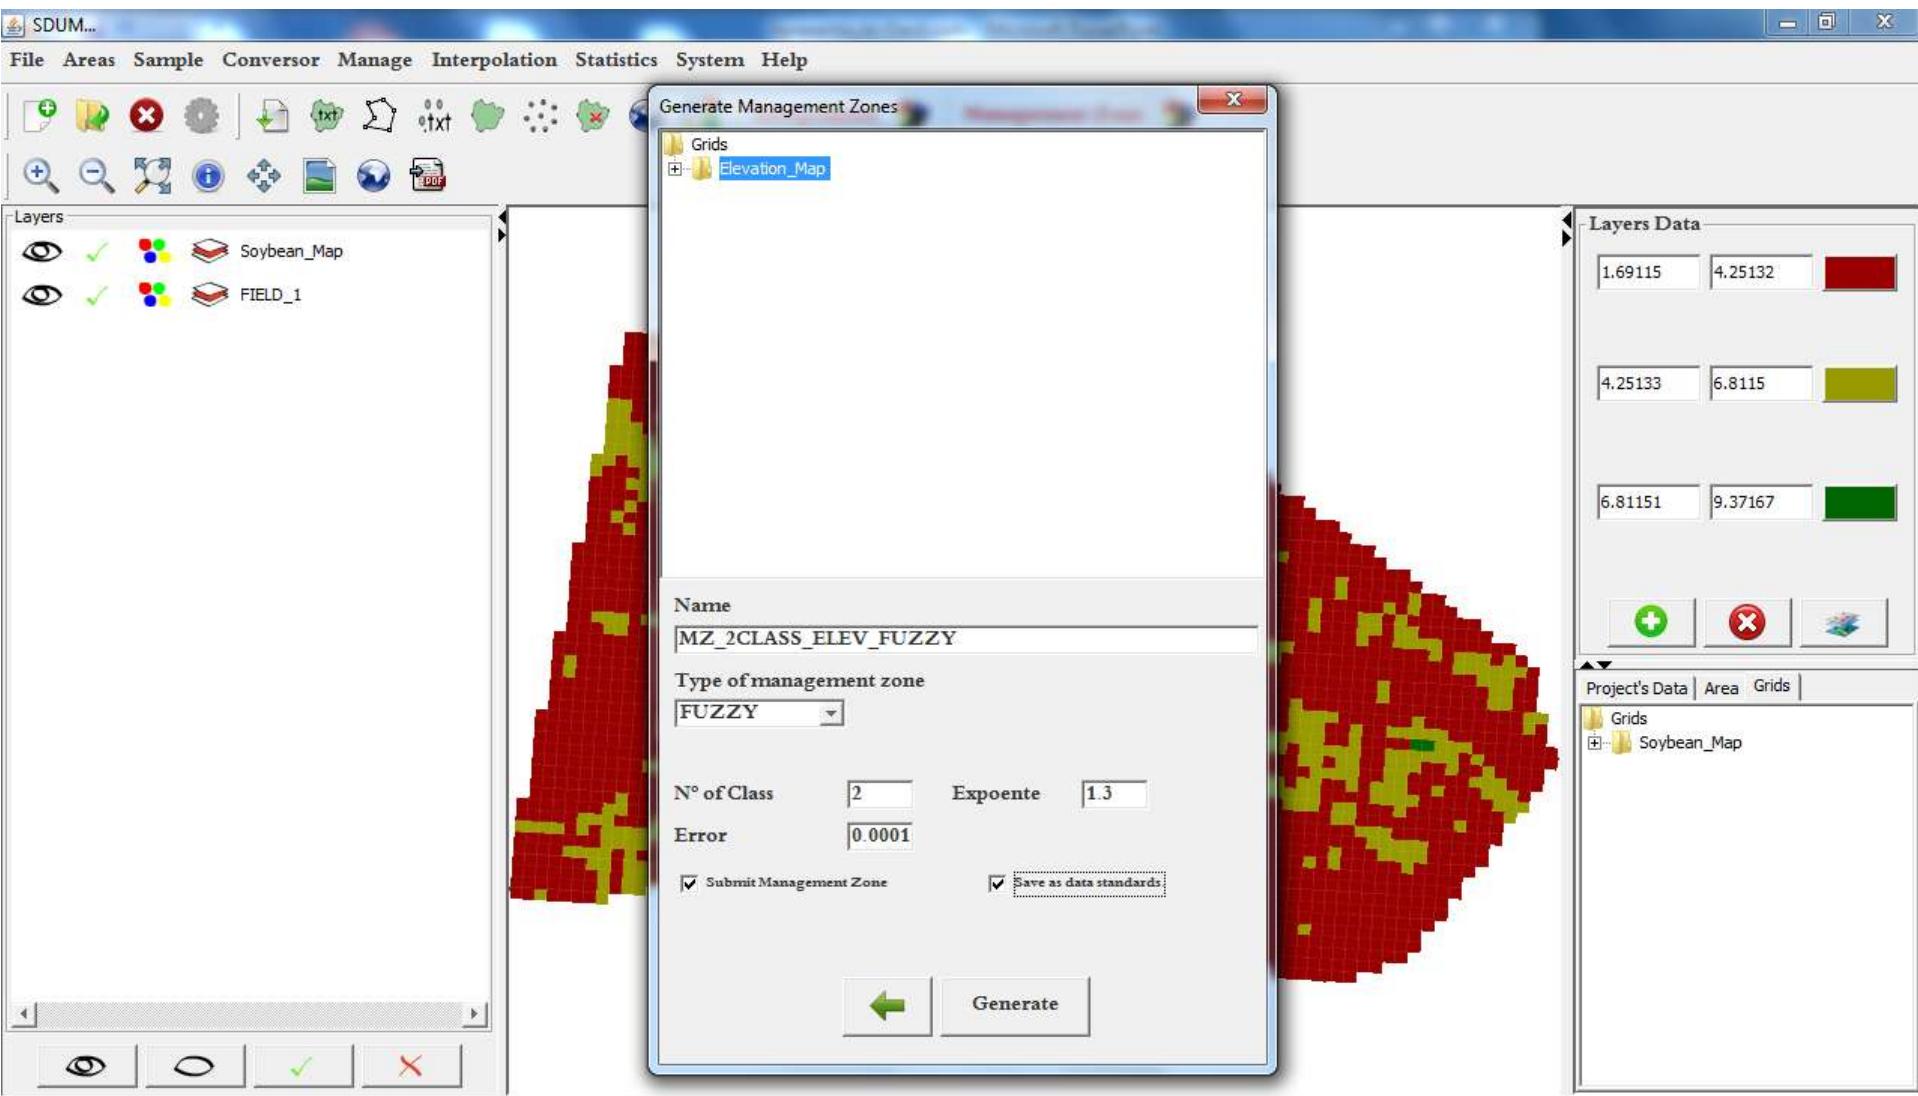

$$PN_{ij} = \frac{P_{ij}}{\bar{P}_j} \times 100$$
$$CV_i = \frac{S_i}{\bar{P}_i}$$
$$ZV_{ij} = \frac{P_{ij} - P_j}{S_j}$$

Conclusion

- The software is a important geospatial tool to generate and evaluate management zones;
- The management data on Precision Agriculture is easy, using the software.

The next steps

- Create geostatistic module;
- Create mobile module (collect data by farmers);

Gestão de Ocorrência

Nome Produtor: José Antonio da Silva

Nome Área: ESTÂNCIA GRANDE RIO

Cidade/UF: Cascavel/PR

Problema: FOLHAS COM MANCHAS ESCURAS

Recomendação: APLICAR ROUNDUP 50 LITROS / HA.

Foto:

Fechar Salvar

The next steps

- Implement new methods to select layers (PCA and MULTISPATI PCA);
- Apply the software in others countries and cultures and implement new aspects of regions and cultures

Thank You!
